PROFILE SUMMARY

- Computer Engineering student experienced in mobile and IoT-based system development.
- Developed React Native & Flutter apps integrated with Firebase services.
- Built Raspberry Pi & Arduino-based IoT system with OpenCV for real-time monitoring.

EXPERIENCE

HÜBTUAM – Engineering Intern

Jun 2025 – Aug 2025

- Developed IoT poultry monitoring system using Arduino, ESP8266, Raspberry Pi 5.
- Implemented OpenCV motion detection, chicken & egg counting.
- Integrated Flutter mobile app with Firebase (Realtime DB & Firestore).

SASKİ – Mobile Developer Intern

Jul 2024 – Aug 2024

- Built zoo mobile app using React Native & Expo.
- Implemented Firebase Authentication & Firestore.
- Used React Navigation and modular UI components.

TRT – Web Development Intern

Jul 2023 – Aug 2023

- Developed responsive React interfaces using component-based architecture.
- Collaborated using Git for version control.

PROJECTS

IoT-Based Smart Poultry Monitoring System | Python, OpenCV, Flutter, Firebase

- Distributed IoT system with real-time environmental monitoring.
- Computer vision-based motion detection & object counting.
- Automated light-based door control tested in real farm environment.

MyZoo Mobile Application | React Native, Firebase

- Cross-platform zoo management mobile app with Firebase backend.

TECHNICAL SKILLS

Languages (Diller): Python, JavaScript, TypeScript

Frameworks & Libraries: React, React Native, Flutter, OpenCV

IoT & Hardware: Arduino, Raspberry Pi, ESP8266

Tools & Platforms: Git, GitHub, Firebase, Figma, Expo

EDUCATION

Hitit University - Faculty of Engineering - Computer Engineering

Sep 2021 – Jun 2026

GPA: 3.00+
